

# Relay Motor Rebroke

## Rebroke private motor policies with Applied Relay™.

**Applied Relay, the product of choice for Ireland's general insurance brokers, developed functionality to rebroke existing and potential private motor policies with ease.**

Traditionally, brokers may call, text, email or mailshot their leads to sell their services when they know a Motor policy is due for renewal. Applied Relay offers a Batch Renewal Invite capability that allows you to easily produce customer invites for large numbers of renewals without the need for constant user interaction throughout the process.

Applied Relay can generate documentation using pre-defined rules and the specific private motor scheme you choose. It also allows you to quote last year's prospects, producing a batch of letters for multiple clients and shows what this year's Motor premium could be based on using the risk details you have saved in the system.

### What Relay Motor Rebroke Offers Your Business

- Ability to pre-configure documents with existing data, keeping you from requesting input from customers or requiring them to acknowledge any messages
- Reports that log any errors and exceptions that occurred with a renewal once the batch invite is complete
- Ability to view, process and print documents via the Document Processing Manager utility

### Allows your business to

- Eliminate the time-consuming administrative tasks involved with renewals
- Deliver more timely customer service
- Retain clients by having a proactive renewal process
